# The approved identity

Soft Editorial Luxury / Source-preserving vector reconstruction

NIVÉ

## 01 / THE STANDALONE MASTER

00_wordmark_master.svg is the editable, outlined master wordmark.
The five source contours retain N, I, V, E and the separate acute accent.
The original image is preserved byte-for-byte in Reference/.

NIVÉ

DESSERTS & LITTLE INDULGENCES

PRIMARY LOCKUP

N

SECONDARY N

The descriptor is DM Sans Medium, converted to paths.
The monogram uses the N from the approved wordmark.
It is not a reproduction of the ornamental N shown on the concept board.

# Spacing & small sizes

Protect the accent, the hairlines and the supporting descriptor.

CLEAR SPACE

Keep at least one quarter of the unaccented capital height clear on all sides.
Measure from the outermost artwork, including the accent and descriptor.
For a frame, measure clear space from the frame edge.

RECOMMENDED STARTING SIZES

Standalone wordmark: 160 px canvas width / 30 mm printed width.
Primary descriptor lockup: 480 px canvas width / 65 mm printed width.
Packaging frame: 480 px canvas width / 70 mm printed width.
Standalone N: 32 px canvas width / 10 mm printed width.

The supplied canvases include margins; these widths refer to the whole file.
At 16 px the N loses fine serif detail. Use 32 px or larger when possible.
Check QA/small-size-proof.png at 100% zoom for the actual-pixel tests.
These are screen-proof recommendations, not physical press test results.
For foil, embossing or absorbent stock, ask the vendor to proof the fine strokes.

# Colour & print handoff

Flat colour. No gradients, shadows, textures or raster logo embeds.

| Warm ivory | Espresso | Butter beige | Muted cherry | Caramel |
|---|---|---|---|---|
| #F5F0E8 | #49352C | #E9CDA5 | #8B4149 | #D9A66C |

SCREEN FILES

SVG and PNG colours use the specified RGB hex values.
Transparent files have genuine alpha; ivory and espresso panels are opaque.
Use ivory or white artwork on dark fields; espresso or black on light fields.

PRINT FILES

Print/ contains scalable vector PDFs with process-CMYK colour values.
Black is K-only. White artwork is intended for placement over a coloured field.
The usage guide also uses process-CMYK colours with embedded text fonts.
The PDF artwork contains outlined lettering and no embedded logo bitmap.

ACTUAL PRINT LIMITATIONS

No press ICC profile, stock, ink system or final package dieline was supplied.
CMYK values use a generic conversion, not a colour-managed press conversion.
These are vector artwork handoff PDFs, not certified PDF/X files.
No bleed or crop marks are added to standalone artwork.
For edge-to-edge printing, place artwork into the printer-approved dieline.
White-ink, foil and embossing separations must be prepared by the print vendor.

Do not stretch the logo, remove the acute accent, add effects or recolour individual letters. Keep the wordmark and descriptor proportions intact.

# Files & verification

A reusable production package, with its original sources retained.

MASTER / 00_wordmark_master.svg
PRIMARY / 01_primary_espresso.svg + 02_primary_espresso.png
IVORY PANEL / 03_primary_ivory.svg + 04_primary_ivory.png
REVERSE / 05_reverse_logo.svg + 06_reverse_logo.png
MONOGRAM / 07_monogram.svg + 08_monogram.png
PACKAGING / 09_packaging_stamp.svg + 10_packaging_stamp.png
MONOCHROME / 11_monochrome_black.svg + 12_monochrome_white.svg

Extras/ includes transparent reverse, monochrome PNGs and an ivory square Instagram avatar. Print/ contains the vector artwork PDFs.
All logo PNGs are 3000 px on the longest side; preview sheets are smaller.
Reference/ preserves all three recovered reference images and the font license.

VALIDATION

Trace silhouette overlap with the cleaned source mask: 97.36%.
SVGs contain paths, with no live type, linked images, filters or gradients.
SVG and PDF rendering, PNG alpha and reference file hashes were checked.
The four letters and separate acute accent were inspected visually.
See QA/validation.json for per-file checks and source SHA-256 hashes.

LIMITATIONS

This is a fitted vector reconstruction of a raster source, not original font data.
Source texture and near-transparent specks were removed; edges are smoothed.
The identity board informs the supporting variants, not an exact board tracing.
No direct Figma or Illustrator application import test was performed.
No trademark clearance, original image ownership or press proof is certified.
